Company Introduction

Sisitech Limited is a software company registered under the companies law act of the Republic of Kenya based at C4Dlab, Riverside Drive, Chiromo. The company was founded by four youth in 2013 while still in University and was later incorporated in 2015.

Sisitech hones an array of skills which has constantly enabled it to deliver a wide array of software solutions; each tailored to the specific needs of our clients. Some of these skills include: Human Centered Design approaches (HCD), Software Design and Development, Business and Information development, Hardware development and configurations, SMS & USSD software implementation, Software Integration and Software Consultancy.

Since inception, Sisitech has been honored to work with renown companies and organization around the globe. Some of these clients include: United Nations Children's Fund (UNICEF); On a delivery of a mobile-based application, with offline and online capabilities that could track and monitor the school attendance of children in marginalized communities in Kenya. The project has been a huge success and the pilot phase is ongoing.

Sisitech has also worked with The Nairobi Innovation Week Committee in the management of the event through providing mobile and web software solutions that saw a huge success of the 3 consecutive annual events.
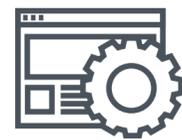

Our Approach

Approach, Solution Design

Our approach features renown principles of design and software development such as design for scale, optimized software designs, data driven designs, secure systems, understanding of existing ecosystems and continuous software support.

Design For Scale

Our software solutions are designed to accommodate growing data and future expansion.

Optimized Software Design

We offer minimalist software designs, optimized to meet your desired specifications.

Data Driven Designs

The solutions we provide are informed by insights gathered from analyzed data points.

Understanding Our Ecosystem

Our solutions are in harmony with the contemporary ecosystem, thus easing adaptation and ensuring comfortable, efficient usage.

Secure Systems

Ensuring your information is protected is something that we regard highly.
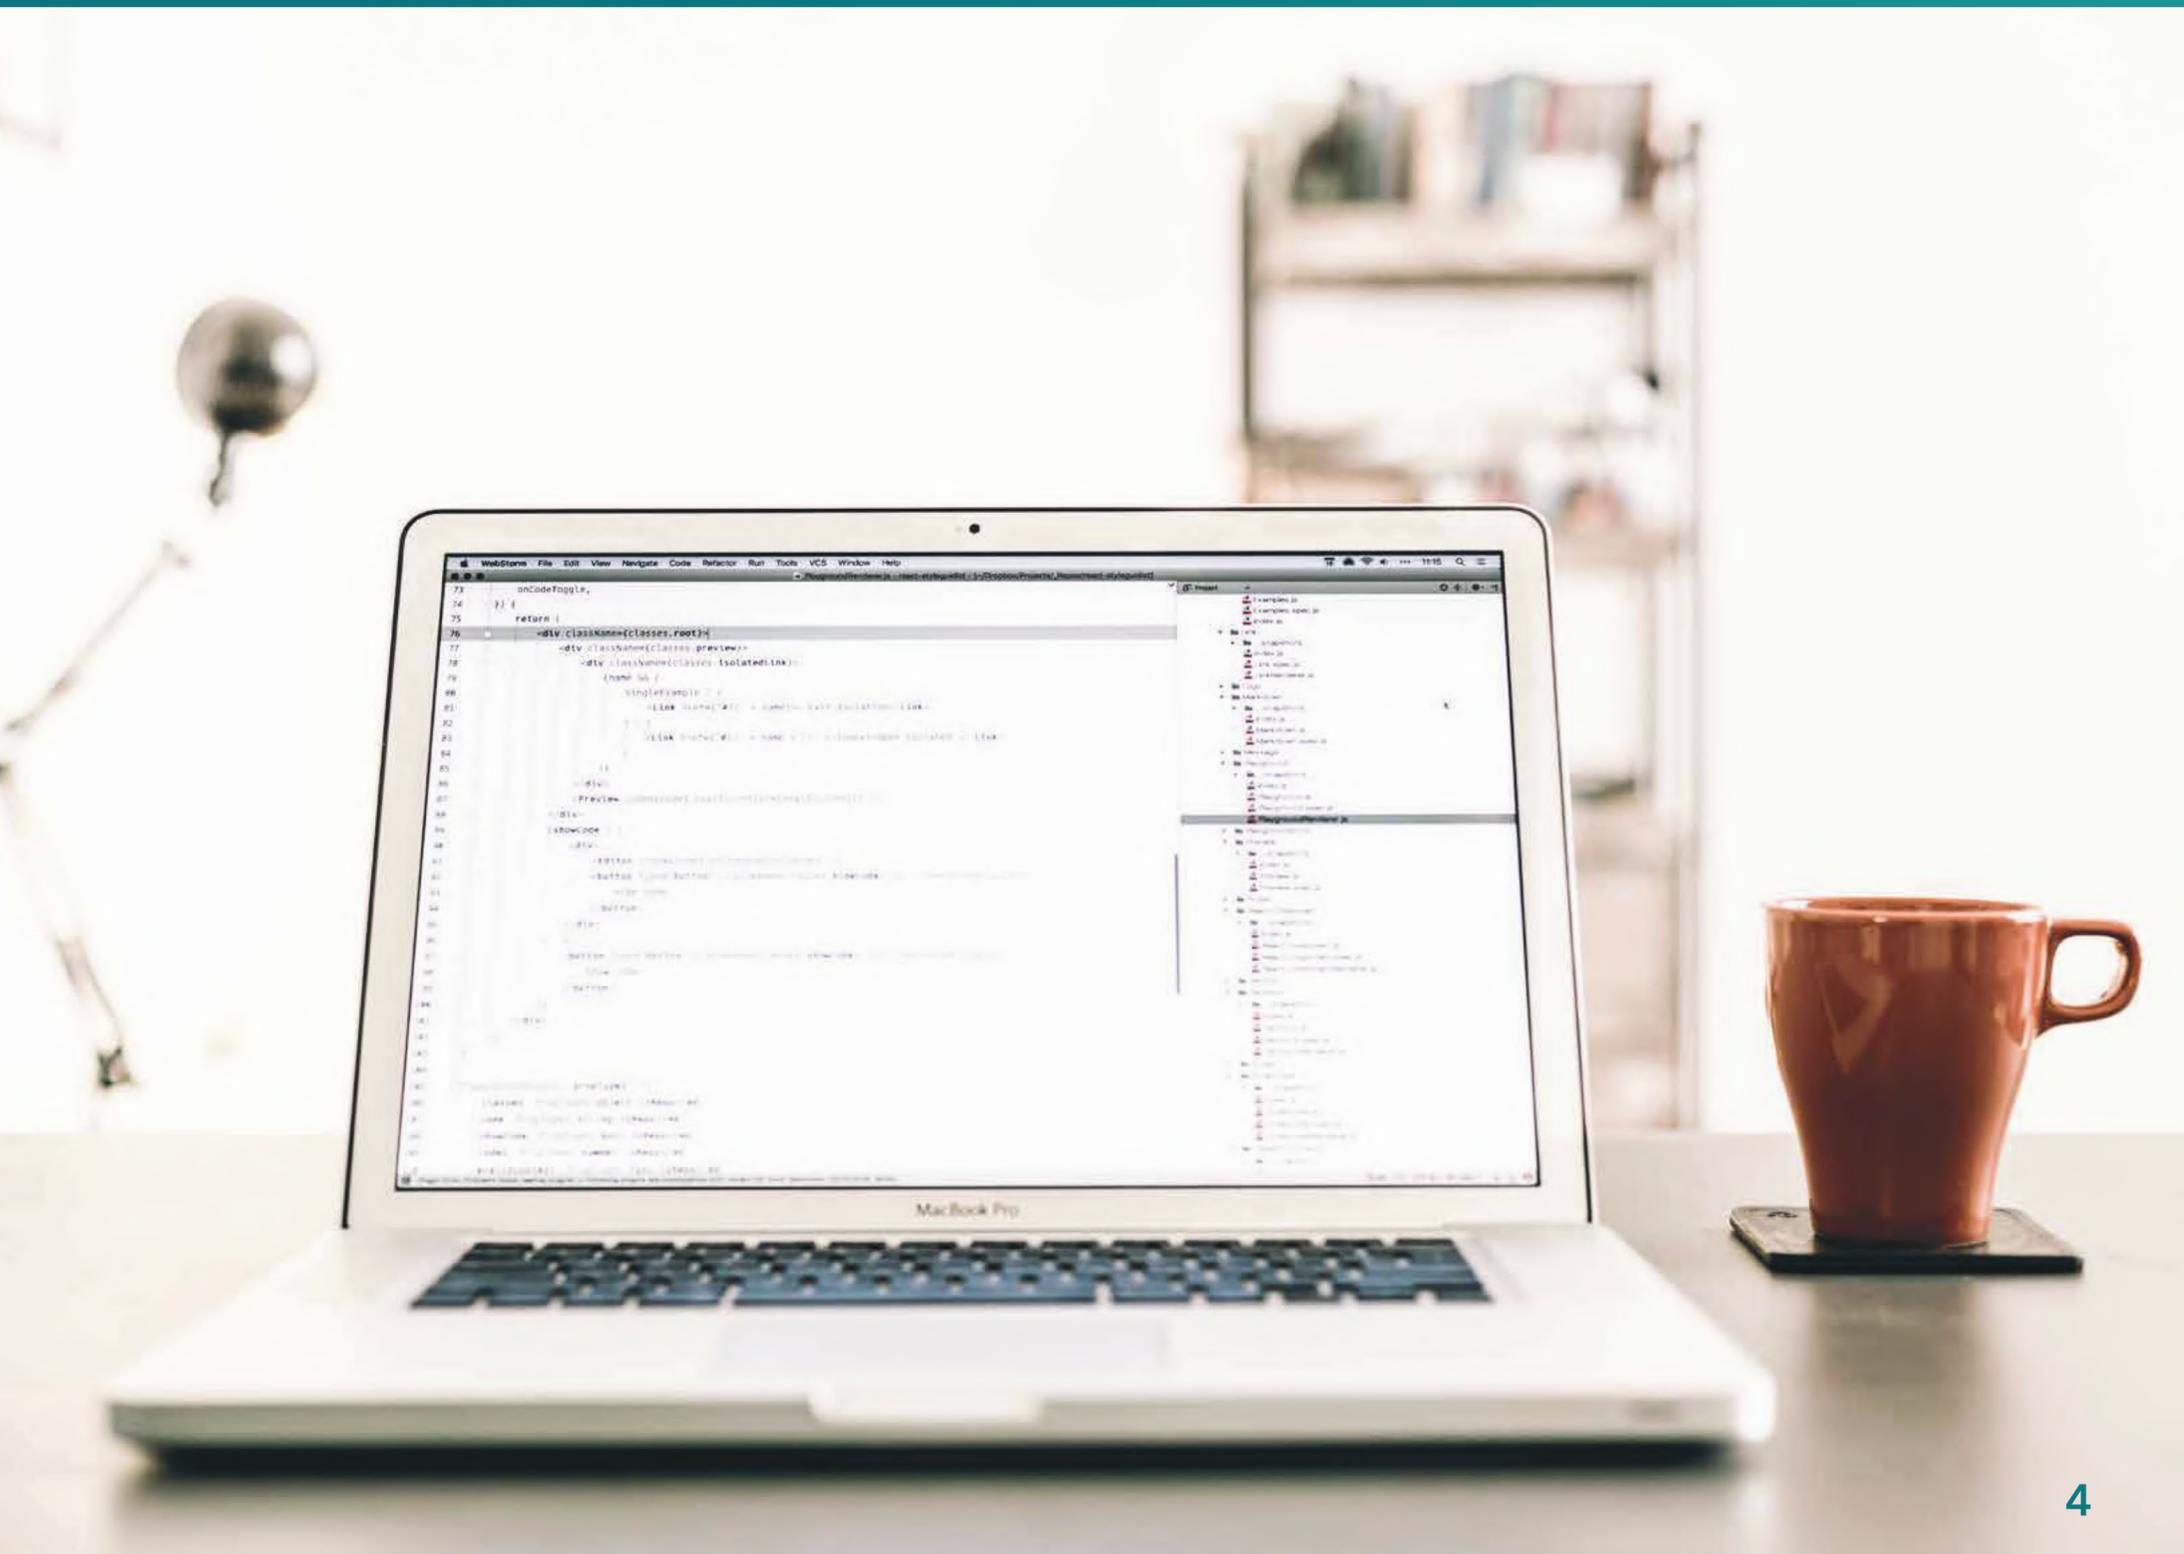

Continuous Software Support

Our team offers reliable customer support ensuring minimal software hitches during use.

Our Services

We offer software solutions to organizations in need of them which are usually tailored to meet their specific needs. These services include :

> Software Applications Development

> Corporate Branding & Design

> Social Media Management

> USSD & SMS Applications

> Training (Workshops, Seminars)

> Technology Infrastructure Support
